Statement of Approximate Gross Earnings of Indian
Railways.

SUPPLEMENT TO
The Gazette of India.

No. 5.]

CALCUTTA, SATURDAY, FEBRUARY 4, 1911.

OFFICIAL PAPERS.

A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.

Non-Subscribers to the Gazette may receive the SUPPLEMENT separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta, or Rupees nine if sent by Post.

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

**Rainfall summary for the seven days ending at 8 hrs. on Thursday,
the 2nd February 1911, based on the Indian Daily Weather
Reports of the period.**

1. The depression which was situated near Lahore on the 26th and the disturbed weather associated with it caused moderate precipitation along the whole length of the Himalayas, and general rainfall in Assam on the 27th the depression moved into the Punjab hills and disappeared, but nearly general rainfall in Assam and Eastern Bengal continued on that day and local falls occurred in north Burma on the 27th and 28th. Meanwhile a fresh depression from Persia which had been under observation since the 27th had begun to give light precipitation in Baluchistan. On the 31st it began to affect Kashmir and the plains of northwest India, but it filled up rapidly after giving moderate local rain in the plains of the extreme north and the submontane districts of the western Himalayas. Elsewhere no important rain fell during the week. Precipitation reached six times the normal amount in Assam, two and a half times the normal in Eastern Bengal, and twice the normal in the west United Provinces; but elsewhere with the exception of the North-West Frontier Province it was almost generally in defect.

2. Temperature was considerably lower than usual in the early part of the week except in northeast India, Burma and the east of the Peninsula. On the 29th temperature fell below normal in northeast India and weather there continued rather cooler than usual for the rest of the period.

3. *Burma*.—In spite of the rather heavy local rain in the northeast of the division during the week the total in the case of those stations for which normals are available was less than usual in Upper Burma, while it was also in defect in Lower Burma. Temperature was in excess during the early part of the week but later fell into considerable defect.

Northeast India, including Orissa.—Rainfall was general in Assam and nearly general in the north of Eastern Bengal and in Bihar on the 26th. It continued to be nearly general in Eastern Bengal and Assam on the 27th, but subsequently, only occasional scattered falls were reported. Weather was relatively very warm during the first two days, but became unusually cool later.

The United Provinces, Central India and the Central Provinces.—Nearly general rain fell in the submontane districts of the United Provinces on the 26th and a few falls were reported from other parts of the provinces. Temperature fell generally at the beginning of the week and was as much as 10° below normal locally on the 27th: during the rest of the week, however, temperature shewed a tendency to recovery.

Northwest India.—Precipitation was reported in Kashmir and along the Himalayas on the 26th, and light falls in Baluchistan and Kashmir on the 27th and 28th. Light rain fell in the plains of the extreme north on the 30th, followed by moderate precipitation in the Himalayan hills and submontane districts on the 31st. Temperature was for the most part considerably below normal.

The Peninsula.—No rain was reported. Temperature was generally higher than usual except in the northwestern parts which were influenced by the disturbances in northwest India.

4. The following are the chief amounts of precipitation as reported at 8 hrs. each day:—

January 27th. Silchar 1·25", Shillong 1·36", Cherrapunji 1·73", Darjiling 0·90", Dehra Dun 2·42", Bahraich 0·80" and Simla 0·81".

„ 28th. Myitkyina 0·91", Silchar 3·94", Tezpur 1·13", Sibsagar 0·96" and Cherrapunji 1·16".

February 1st. Chakrata 1·50" and Simla 0·80".

5. Precipitation for the period, December 2nd to February 2nd, was normal in Assam and Central India East, about twice the normal amount in the United Provinces, the Punjab, Kashmir, the North-West Frontier Province, Baluchistan and Berar, but in slight to large defect elsewhere.

DIVISION.	RAINFALL DATA FOR WEEK ENDING ON 2ND FEBRUARY 1911.			RAINFALL DATA FROM 2ND DECEMBER 1910 TO 2ND FEBRUARY 1911.				
	Actual rainfall in inches.	Normal rain- fall in inches.	Excess or defect in inches.	Actual rainfall of season to date in inches.	Normal rainfall in inches.	Excess or defect in inches.	SEASONAL PERCENTAGE DEPARTURE FROM NORMAL.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Season and Crop Prospects for the week ending Saturday,
28th January 1911.

Burma.—Slight showers fell in the northern districts and the Arakan hill tracts. Harvesting of winter rice is nearly completed. Threshing and winnowing are progressing generally. Cultivation of spring rice and miscellaneous spring crops is proceeding normally. Clearing of hill-sides for rice cultivation is in hand. Standing crops are satisfactory. The prices of unhusked rice have risen further at the principal export towns and prices are generally above the normal.

Eastern Bengal and Assam.—Heavy rain fell in the Surma Valley division and the extreme north-east corner of the Province, the heaviest fall being 10 inches at Karimganj. Light to moderate rain was received elsewhere. Harvesting of winter rice is practically over. Gathering of mustard and pulses and crushing of sugarcane are in progress. Fields are being ploughed for autumn rice and jute. Transplantation of spring rice is progressing. Prospects of standing crops are good. Stocks of food grains are normal. The average price of common rice continues unchanged. Cattle disease prevails in Rajshahi and Sibsagar.

Bengal.—The rainfall was general in Bihar (except in Gaya and the Sonthal Parganas) and also in Hooghly, Howrah, the 24-Parganas, Jessore, Khulna, Darjeeling and Cooch Behar. The fall was generally moderate except in Darjeeling and Cooch Behar and parts of Purnea and Jessore where it was rather heavy, being above an inch. The recent rainfall has been beneficial to spring crops in Darbhanga and Purnea. More rain is wanted for the crops in Howrah and Nadia. Threshing of winter rice and pressing of sugarcane continue. Standing spring crops are doing well. Some damage has been done to the crops by hail in Champaran. The price of common rice has risen in Burdwan, Champaran, Muzaffarpur, Monghyr, Bhagalpur and Puri and has fallen in Murshidabad, Jessore, Hazaribagh, Palamau and Cooch Behar. Cattle disease is reported from Patna, Muzaffarpur, the Sonthal Parganas, Angul, Puri, Sambalpur, Hazaribagh, Palamau and Manbhum. Fodder is reported to be getting scarce in parts of the Sonthal Parganas. The supply of water is sufficient throughout the Province.

United Provinces.—The rainfall in the Himalayan districts averaged 2 inches. Useful showers also fell in the sub-montane, south-eastern and Upper Doab districts. Some districts report hail stones but no appreciable damage has been done. The condition of standing crops, including poppy, is excellent. Weeding and irrigation of spring crops and pressing of sugarcane continue. Fields are being prepared for extra crops. Seventeen districts report sporadic cattle disease but the general condition of stock continues satisfactory. Prices have fallen in seventeen districts and have remained practically stationary elsewhere.

Punjab.—Good to moderate rain fell in all districts except Ferozepore, Lahore and Multan. Pressing of sugarcane and harvesting of *toria* are still in progress in several districts. Ploughings for and sowings of extra spring crops are in progress in several districts. The condition and prospects of standing crops are generally good. Rats are doing some damage to spring crops in parts of Rohtak and Ferozepore. Prices are easy and are generally unchanged. Cattle are in good condition. Fodder is sufficient.

North-West Frontier Province.—Good rain fell in the Hazara, Peshawar and Kohat districts and showers elsewhere which proved very beneficial to standing crops, especially unirrigated crops. The condition of standing crops is generally average to good but unirrigated crops in Dera Ismail Khan are reported below the average. Slight hail fell in Dera Ismail Khan but did no damage to crops. Cold winds are prevailing in Dera Ismail Khan. Pressing and planting of sugarcane are still in progress in the Bannu district. The water supply is sufficient throughout the Province but is somewhat scanty in the Shigga and Pakha circles of the Marwat tahsil in the Bannu district. There is no irrigation from the Paharpur canal in the Dera Ismail Khan district. Fodder is generally procurable but its price has risen in Dera Ismail Khan. The condition of cattle is generally good except that disease is prevalent in one village of the Mardan tahsil in the Peshawar district. The public health is good except in one village of the Marwat tahsil. Prices of food grains show a slight tendency to fall. Prices:—wheat $13\frac{1}{4}$ to 19; gram $18\frac{3}{8}$ to 30; maize $16\frac{1}{4}$ to $29\frac{3}{4}$ and *bajra* 20 to $23\frac{7}{8}$ seers per rupee.

Jammu.—Prices are stationary. Wheat sells from 13 to 24 and maize from 18 to 27 seers per rupee. The condition of standing crops is good. Cattle disease of ordinary type prevails in the Akhnur, Riasi and Basohli tahsils. Fodder is sufficient.

Kashmir.—It rained and snowed during the week. The temperature is, at freezing point. There is some disease among cattle. Prices are stationary.

Rajputana.—Rain fell during the week in Banswara, Jaipur, Kishangarh, Alwar and Ajmer. The minimum fall was 3 and the maximum 8 cents. Spring crops are being irrigated and are in good condition. Cattle disease is prevalent in parts of Banswara and Jhalawar. Fodder is sufficient. Prices have risen in Jhalawar by 6 seers 8 chattaks; they have fallen by 2 seers in Mewar, Banswara and Tonk and by 1 seer in Partabgarh and Shahpura. They were steady or fluctuated slightly elsewhere.

Central India.—Light showers are reported from Alirajpur, Jhabua, and Mehidpur. The weather is unusually cold with a piercing north wind which is causing damage to wheat and gram. Standing crops are so far in good condition and fodder is plentiful. Cattle disease prevails in parts of Indore, Gwalior, Baghelkhand, Bundelkhand and Bhopawar. Prices continue high in Baghelkhand and easy elsewhere. Poppy is in good condition. Sowing has been completed and crops are being irrigated in Gwalior. Watering is in progress in Indore.

Central Provinces.—The weather has been clear and cool and occasionally cloudy. Threshing and winnowing of autumn crops and picking of cotton have almost been completed. The condition of spring crops is generally satisfactory and prospects so far are favourable. Fodder and water are ample. Agricultural stock is in good condition. Prices:—the price of *juar* fell in Chhindwara by 4 seers and rose in Buldana by 2 seers per rupee. Gram sells cheaper by 3 seers in Amraoti and dearer by $2\frac{1}{2}$ seers in Buldana. Elsewhere variations were unimportant.

Feudatory States.—Threshing and winnowing of autumn crops still continue. Prospects of spring crops are generally good everywhere. The supply of fodder and water is adequate. Prices:—gram fell by 3 seers per rupee in Kanker. Prices remained stationary elsewhere.

Bombay.—Slight rain fell during the week in parts of Karachi, the Panch Mahals, Broach, Surat and Rewa Kantha. Standing spring crops are in good condition except for slight damage by frost in parts of Sukkur and by the cold in parts of Poona and Sholapur. Harvesting of autumn crops has nearly been completed. Threshing continues in parts of the Konkan, Poona, East Khandesh, Nasik and Ahmednagar. Estimates of outturn are generally fair to good. Harvesting of spring crops is in progress in Broach, West Khandesh, Poona, Sholapur, Dharwar, Baroda and Rewa Kantha. Cotton picking continues in parts of Hyderabad, Ahmedabad, Kaira, Broach, East Khandesh, Poona, Sholapur, Baroda and Rewa Kantha. The fodder supply is adequate. Agricultural stock is deficient in parts of Ahmednagar, Poona, Sholapur and Satara but is generally in good condition. The supply of water for drinking and irrigation is adequate. Grain stocks are sufficient. Prices have risen in the Upper Sind Frontier, the Panch Mahals, East Khandesh and Belgaum and are generally stationary elsewhere. The quantity purchasable per rupee is in Sind 8 to 31 per cent. in the Konkan 9 to 28 per cent., in the Deccan 7 to 33 per cent., and in the Karnatak 10 to 35 per cent. less than the normal. In Gujarat prices ranged from normal to 29 per cent. less.

Hyderabad.—No rain fell during the week. Early rice is being harvested in places. Spring crops are being weeded in places and are fair to good throughout. The crops have been damaged somewhat by insects in parts of the Karimnagar and Raichur districts. Spring *juar* is weak in a few places. Harvesting of the crop has begun in places. Late rice lands are still under preparation and sowings are proceeding. Cattle disease prevails in 15 talukas. Prices:—wheat $7\frac{1}{4}$, coarse rice $7\frac{1}{4}$ and *juar* $15\frac{3}{4}$ seers per rupee. White *juar* is selling in Hyderabad city at 13 and yellow *juar* at 14 seers. The highest price in districts is 9 seers in Warangal and Adilabad and the lowest 24 seers in Bir and Mahbubnagar.

Mysore.—Prices of food grains are generally steady. Markets are well supplied. Standing crops are in good condition. The outturn of harvests is good. Prospects of the season are good. Cattle are generally healthy. Water and fodder are available.

Coorg.—Rainfall nil. Picking of coffee and harvesting of rice continue. Prospects are generally fair. Prices of food grains are normal. Water and fodder are ample.

Madras.—Light rain fell during the week in Malabar and *nil* elsewhere. The rainfall in thirteen districts is above the average of the last thirty-five years. Irrigation supplies are sufficient except in parts of Kurnool, Bellary, Nellore, Chingleput and Trichinopoly. Ploughing, sowing, weeding and transplanting are in progress in parts. Standing crops are fair to good but some in parts of Guntur, Chingleput, Tanjore, Madura and Tinnevely require rain and some in parts of Madura and Tinnevely are withering. Coffee in parts of one taluk of the Nilgiris has been affected by bug. Harvests continue with outturn fair to normal. Pasture is sufficient except in parts of Ganjam, Guntur, Coimbatore, Trichinopoly and Tinnevely. Fodder is scanty in parts of Nellore. The condition of cattle is generally good. The price of rice is stationary in six districts, has fallen in seven and has risen in ten. Prices of millets have fluctuated as follows:—*Ragi* is stationary in six districts, has fallen in six and has risen in nine. *Cholam* is stationary in three districts, has fallen in five and has risen in six. *Cumbu* is stationary in four districts, has fallen in six and has risen in five. The public health is generally good. Prospects are generally fair. The condition of the labouring classes is everywhere satisfactory and employment is readily available. Grain stocks are sufficient.

SUPPLEMENT TO
The Gazette of India.

No. 6.]

CALCUTTA, SATURDAY, FEBRUARY 11, 1911.

OFFICIAL PAPERS.

A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.

Non-Subscribers to the Gazette may receive the SUPPLEMENT separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta, or Rupees nine if sent by Post.

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

**Rainfall summary for the seven days ending at 8 hrs. on Thursday,
the 9th February 1911, based on the Indian Daily Weather
Reports of the period.**

1. The disturbed conditions in north-east India disappeared at the beginning of the week and weather became dry in all parts except the extreme south of the Peninsula where slightly disturbed conditions gave rise to scattered falls of rain on the 2nd, 3rd and 4th. On the 5th signs of a fresh depression appeared in the extreme north and in east Baluchistan, but the disturbance was of only slight intensity and disappeared after giving on the 6th light local falls of snow in Kashmir. The precipitation of the week was normal, or in defect everywhere, except in Malabar and the Bay Islands.

2. Except in the extreme north and in Baluchistan and parts of north-west India both day and night temperatures were below normal during the early part of the week, the defect in the daily mean reaching 20° at some stations in Kashmir and 15° locally in the Central Provinces. The deficiency persisted almost generally, but became less marked until the 5th and extended southwards. By the 6th warmer conditions from Baluchistan had embraced the greater part of north-west India, but low temperature prevailed in Kashmir throughout the week.

3. *Burma*.—A light fall of rain occurred at Kyaukpyu on the 2nd but no further falls of importance were reported during the week. Temperature was almost generally below normal.

Northeast India, including Orissa.—A light fall of rain on the 5th was reported from Darjiling, but except along the Himalayas skies were nearly cloudless throughout. In the early part of the week temperature was almost generally in defect, but the deficiency thereafter became less marked.

The United Provinces, Central India and the Central Provinces.—No rainfall of importance was reported. Both day and night temperatures were in large defect at the beginning of the week but later became nearly normal. On the 8th weather became slightly disturbed and moderate cloud appeared.

Northwest India.—On the 5th heavy cloud appeared in the extreme north and in east Baluchistan. Light snowfall occurred at Srinagar and Minimarg on the 6th but the disturbance gave no further precipitation of importance.

The Peninsula.—Weather was slightly disturbed in the extreme south until the 5th and scattered falls of rain occurred. Temperature was at first low in the northern parts, but later became about normal, and the low temperature conditions moved to the Madras Deccan and Mysore.

4. The only considerable amount of rain reported was 1 inch at Cochin on the 3rd.

5. The precipitation of the period 2nd December 1910 to 9th February 1911 was about normal in Assam, the United Provinces, the Punjab, Kashmir, the North-West Frontier Province, Baluchistan and Berar, the amounts ranging up to 100 per cent. in the Punjab East and North, elsewhere it was in defect.

DIVISION.	RAINFALL DATA FOR WEEK ENDING ON 9TH FEBRUARY 1911.			RAINFALL DATA FROM 2ND DECEMBER 1910 TO 9TH FEBRUARY 1911.			SEASONAL PERCENTAGE DEPARTURE FROM NORMAL.	
	Actual rainfall in inches.	Normal rain- fall in inches.	Excess or defect in inches.	Actual rainfall of season to date in inches.	Normal rainfall in inches.	Excess or defect in inches.	This week.	Last week.

for Director-General of Observatories.

E. D. MACLAGAN,
Secretary to the Government of India.

SIMLA;
The 9th February 1911.

GOVERNMENT OF INDIA.
DEPARTMENT OF REVENUE AND AGRICULTURE.

Season and Crop Prospects for the week ending Saturday, 4th February 1911.

Burma.—Mergui received over 3 inches of rain during the week. Slight showers fell in three other districts of Lower Burma, in three districts of Upper Burma, in the Northern Shan States and the hill tracts of Pakokku. Threshing and winnowing of winter rice have been completed in several districts. Transplanting of spring rice and cultivation of island crops are progressing. Standing crops are doing well. Variations in the prices of unhusked rice are few and unimportant.

Eastern Bengal and Assam.—Light rain fell in parts of the Assam Valley division and in the hills. Practically no rain was received elsewhere. Transplantation of spring rice, gathering of mustard and crushing of sugarcane are in progress. Preparatory cultivation of the soil for autumn rice and jute are going on. Prospects of standing crops are fair. Stocks of food grains are normal. The average price of common rice has fallen by 1 per cent. Cattle disease prevails in Chittagong, Noakhali, the Jaintia Hills and Darrang.

Bengal.—There was no rain during the week except light showers in Midnapore Hooghly, Howrah, Darjeeling, Balasore and in all the districts of the Presidency division except Murshidabad. Threshing of winter rice and pressing of sugarcane continue. Harvesting of oilseeds has commenced. Standing spring crops are doing well. More rain is wanted for the crops in Nadia and Murshidabad. The price of common rice has risen in Murshidabad, Jessore, Khulna, Monghyr, Balasore, Puri, Sambalpur and Cooch Behar and has fallen in Patna, Darjeeling and Hazaribagh. Cattle disease is reported from Muzaffarpur, the Sonthal Parganas, Angul and Puri and from all the districts of the Chota Nagpur division except Singhbhum. Fodder is reported to be getting scarce in parts of the Sonthal Parganas. The supply of water is sufficient throughout the Province.

United Provinces.—The rainfall during the week was practically *nil*. The condition of standing crops and poppy continues excellent. Pressing of sugarcane and sowing of extra crops are in progress. Cattle disease is reported in parts of nine districts but the general condition of stock is good. Fodder and supplies are ample. Prices have fallen in fifteen districts and remain generally stationary elsewhere.

Punjab.—Good to moderate rain fell in Ambala, Jullundur, Lahore, Amritsar, Sialkot, Shahpur, Rawalpindi and Mianwali. Pressing of sugarcane is in progress in certain districts. Harvesting of *toria* continues in Lyallpur. Ploughings for and sowings of extra spring crops are in progress in several districts. The condition and prospects of standing crops are generally good. Slight damage has been caused by hail-stones in parts of Ambala and Mianwali. Prices are easy. Cattle are in good condition. Fodder is sufficient.

North-West Frontier Province.—Showers fell all over the Province except in Dera Ismail Khan and were very beneficial to standing crops, especially unirrigated crops. Rain is required in Dera Ismail Khan. The condition of standing crops generally is from average to good but unirrigated crops in the Dera Ismail Khan district are reported below the average. A light fall of snow occurred in Bannu which has slightly damaged the sugarcane crop. In the Dera Ismail Khan district also crops have been damaged slightly by cold winds. Sugarcane pressing and planting are still in progress in the Bannu district. Water is somewhat scanty in the Shigga and Pakha circles of the Marwat tahsil in the Bannu district but is sufficient elsewhere. There is no irrigation from the Paharpur canal in the Dera Ismail Khan district. Fodder is generally procurable throughout the Province but the price is rising in Dera Ismail Khan. Cattle are generally in good condition. The public health is good. Prices of food grains show a slight tendency to rise. Prices:—wheat $13\frac{1}{4}$ to $18\frac{3}{4}$, gram $18\frac{3}{8}$ to 30, maize $16\frac{1}{8}$ to $29\frac{1}{4}$ and *bajra* 20 to $23\frac{1}{2}$ seers per rupee.

Jammu.—Prices are stationary. Wheat sells from 13 to 22 and maize from 19 to 29 seers per rupee. The condition of standing crops is good. Cattle disease of ordinary type prevails in Sambha, Kathua and Rajouri. Fodder is sufficient.

Kashmir.—It snowed twice during the week and the cold has reached freezing point. Fodder is sufficient. There is no disease among cattle. Prices are unchanged.

Rajputana.—The rainfall during the week was 19 cents in one district of Bikaner. Spring crops are being irrigated and are in good condition. Slight damage has been done to gram in parts of the hilly tracts of Marwar and Jaipur. Cattle disease is prevalent in parts of Banswara and Jhalawar. Fodder is sufficient. Prices have risen by 1 seer in Partabgarh and Ajmer, by 2 seers in Kishangarh and by 3 seers in Karauli. They have fallen by 1 seer in Bikaner, Bundi and Bharatpur and by 2 seers in Mewar. They were steady or fluctuated slightly elsewhere.

Central India.—Light showers are reported from Dhar, Barwani and Jhabua. The severe cold and frost have caused slight damage to wheat and gram and serious damage to *arhar*, linseed and opium. Standing crops are so far in good condition and fodder is plentiful. Cattle disease prevails in all the Agencies except Bhopal and Malwa. Prices continue high in Baghelkhand and low in Bhopal. They are fluctuating in Indore and steady elsewhere. Poppy is in fair condition. Crops are being irrigated in Gwalior and Indore.

Central Provinces.—The weather continues to be clear and cool and occasionally cloudy. Threshing and winnowing of autumn crops and picking of cotton still continue in a few districts. Wheat, linseed and pulses were damaged slightly by frost and cloudy weather in parts of the Saugor, Jubbulpore, Mandla, Narsinghpur, Chhindwara, Bhandara and Buldana districts. Pulses and sugarcane have suffered considerably from frost in Betul, where wheat was also somewhat injured. Otherwise, prospects of spring crops are generally favourable. Harvesting of linseed has commenced in Wardha, Chanda and Bhandara and of pulses in Nimar, Betul, Drug and Bilaspur. Planting and pressing of sugarcane are in progress in Betul and Chhindwara. The supply of fodder and water is adequate everywhere. Cattle are doing well. Prices:—the price of wheat remained stationary in sixteen districts, gram and *juar* in eighteen and rice in nineteen. *Juar* rose by 4 seers per rupee in Chhindwara.

Feudatory States.—The condition of spring crops is generally good. Fodder and water are sufficient. Prices:—rice rose in Khairagarh and wheat fell in Raigarh by 2 seers per rupee.

Bombay.—Slight rain fell during the week in parts of Sind, Ahmedabad, Kaira, Surat, Thana, Nasik and Cutch. Standing spring crops have been damaged slightly by frost in parts of Karachi, Sukkur, Larkana, Gujarat, the Deccan, Baroda, Palanpur and Rewa Kantha, by unfavourable winds in Kolhapur and are good elsewhere. Threshing of autumn crops continues in parts of Broach, the Konkan and the Deccan. Estimates of outturn are generally fair to good. Harvesting of spring crops are progressing in parts of the Deccan, the Karnatak, Cutch and Kolhapur. Cotton has been damaged by frost in parts of Gujarat, Baroda and Palanpur. Picking of cotton continues in parts of Gujarat, Sholapur, Baroda, Cutch and Rewa Kantha. The fodder supply is adequate. Agricultural stock is deficient in parts of the Deccan but is generally in good condition. The supply of water for drinking and irrigation is generally adequate. Grain stocks are sufficient. Prices have risen in Hyderabad, the Upper Sind Frontier and Satara, have fallen in Sukkur and East Khandesh and are generally stationary elsewhere. The quantity purchasable per rupee is in Sind 8 to 40 per cent, in the Konkan 13 to 28 per cent, in the Deccan 7 to 32 per cent and in the Karnatak 10 to 34 per cent less than the normal. In Gujarat prices ranged from normal to 29 per cent less.

Hyderabad.—No rain fell during the week. The early rice harvest is almost over. Spring crops are fair to good and are being harvested in places. The severe cold has damaged spring *juar* in places. Late rice is being weeded and sowings are still proceeding in places. Cattle disease prevails in fourteen talukas. Prices:—wheat $7\frac{1}{2}$, coarse rice $7\frac{1}{4}$ and *juar* $15\frac{1}{2}$ seers per rupee, showing a fall of $\frac{1}{4}$ seer in the price of wheat and a rise of $\frac{1}{4}$ seer in the price of *juar*. White *juar* is selling in Hyderabad City at 13 and yellow *juar* at 14 seers. The highest price in districts is 9 seers in Warangal and Adilabad and the lowest 24 seers in Nander and Mahbubnagar.

Mysore.—The prices of food grains have fallen slightly in Hassan and are steady elsewhere. Markets are well supplied. Standing crops are in good condition. Harvesting operations are in progress. Cattle are generally healthy. Water and fodder are available.

Coorg.—Rainfall *nil*. Picking of coffee and harvesting of rice continue. Prices of food grains are normal. Water and fodder are ample.

Madras.—The rainfall during the week was fair in the Nilgiris, light in Coimbatore Tanjore, Madura, Tinnevely and Malabar and *nil* elsewhere. The rainfall in thirteen districts is above the average of the last thirty-five years. Irrigation supplies are sufficient except in parts of Kurnool, Nellore, Chingleput and Trichinopoly. Ploughing, sowing, weeding and transplanting are in progress in parts. Standing crops are fair to good but some in parts of Guntur, Salem and Madura require rain and some in parts of Chingleput, and Tinnevely are withering or have withered. Coffee in parts of the Nilgiris has been affected by bug. Harvests continue with outturn fair to normal. Pasture is sufficient except in parts of Ganjam, Guntur, North Arcot, Coimbatore, Trichinopoly and Tinnevely. Fodder is scanty in parts of Nellore. The condition of cattle is generally good. The price of rice is stationary in eight districts, has fallen in nine and has risen in six. The prices of millets have fluctuated as follows:—*Ragi* is stationary in nine districts, has fallen in nine and has risen in three. *Cholam* is stationary in four districts, has fallen in five and has risen in five. *Cumbu* is stationary in six districts, has fallen in four and has risen in six. The public health is generally good. Prospects are generally fair. The condition of the labouring classes is everywhere satisfactory and employment is readily available. Grain stocks are sufficient.

Railways.

SUPPLEMENT TO
The Gazette of India.

No. 7.]

CALCUTTA, SATURDAY, FEBRUARY 18, 1911.

OFFICIAL PAPERS.

A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time, containing such Official Papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The debates of the Legislative Council of His Excellency the Governor General will in future be published in PART VI of the GAZETTE.

Non-Subscribers to the Gazette may receive the SUPPLEMENT separately on a payment of five Rupees per annum if delivered in Calcutta, or eight Rupees if sent by Post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of Rupees six per annum if delivered in Calcutta, or Rupees nine if sent by Post.

No Official Orders or Notifications, the Publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Rainfall summary for the seven days ending at 8 hrs. on Thursday, the 16th February 1911, based on the Indian Daily Weather Reports of the period.

1. The disturbance lying over the northeast of the Peninsula on the 9th gave light rain on that date in Orissa and a few falls in Eastern Bengal and Assam on the 10th, but no further rainfall of consequence occurred in northeast India. Weather became somewhat unsettled in northwest India and Kashmir on the 10th and a depression from Persia gave light to moderate snowfall in Kashmir from the 12th to the 15th. Elsewhere no important precipitation was reported.

2. Except in parts of northwest India, temperature was low at the beginning of the week, the defect being considerable in the central parts of the country and in Burma. Later, however, it rose almost everywhere and at the end of the week was above normal except in the Peninsula and parts of northeast India.

3. *Burma*.—No rain of importance was reported. Temperature was below normal at most places during the greater part of the week.

Northeast India, including Orissa.—A few falls of rain occurred in Assam and Orissa on the 9th and in Assam and Bengal on the 10th, but no further falls of

importance were reported. Temperature was low in the early portion of the week, but had risen above normal in the more northern parts by the 15th.

The United Provinces, Central India and the Central Provinces.—No rainfall was reported. Conditions were generally much cooler than usual at the beginning of the week, but later temperature rose above normal in the northern and northwestern parts of the area.

Northwest India.—Weather along the frontier and in the extreme north was slightly disturbed during almost the whole week. Light precipitation occurred on the 14th in Baluchistan, and light to moderate precipitation from the 12th to the 15th in Kashmir. Temperature was above normal in Baluchistan and the adjacent parts at the beginning of the week and by the end of the week had risen above normal everywhere.

The Peninsula.—No rainfall of importance was reported, and temperature was lower than usual at most places.

4. The greatest fall of rain during the week was 1 inch at Tezpur on the 10th.

5. Precipitation during the week was generally normal or below normal and for the period 2nd December to 16th February was in excess in Assam, the United Provinces, the Punjab, Kashmir, the North-West Frontier Province, Baluchistan and Berar, but was in defect elsewhere.

DIVISION.	RAINFALL DATA FOR WEEK ENDING ON 16TH FEBRUARY 1911.			RAINFALL DATA FROM 2ND DECEMBER 1910 TO 16TH FEBRUARY 1911.				
	Actual rainfall in inches.	Normal rain- fall in inches.	Excess or defect in inches.	Actual rainfall of season to date in inches.	Normal rainfall in inches.	Excess or defect in inches.	SEASONAL PERCENTAGE DEPARTURE FROM NORMAL.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Season and Crop Prospects for the week ending Saturday,
11th February 1911.

Burma.—A little rain fell during the week in Myitkyina and *nil* elsewhere. Threshing and winnowing of winter rice are nearly finished. Cultivation of spring rice and miscellaneous spring crops is progressing satisfactorily. Standing crops are in good condition. The price of unhusked rice is above the normal in Lower Burma.

Eastern Bengal and Assam.—The week was dry everywhere except for a shower in parts of the Dacca division, the Assam Valley and the hills. Harvesting of rape, linseed, pulses and sugarcane is proceeding. The average yield of sugarcane is good but that of oilseeds is only fair. Tobacco has been injured by the cold weather; it is otherwise in good condition. Cultivation for autumn rice and jute have been facilitated by the rain received a fortnight ago. Scarcity of food grains is reported in parts of the Naga and Lushai Hills. In other places local stocks are generally sufficient. The average price of common rice has again fallen by 1 per cent. Cattle disease prevails in Chittagong, Noakhali, Darrang and Nowgong.

Bengal.—During the week the rainfall was general in the Orissa and Presidency divisions (Sambalpur and the 24-Parganas excepted) and also in Burdwan and Larjeeling. The fall was heavy in Cuttack, Balasore, Jessore and Khulna and light to moderate elsewhere. The recent rainfall has been beneficial to standing spring crops in Nadia. Threshing of winter rice has been nearly finished. Pressing of sugarcane and harvesting of oilseeds and pulses continue. Standing spring crops are doing well. The price of common rice has risen in Burdwan, Nadia, Murshidabad, Gaya, Shahabad, Darbhanga, Monghyr, Purnea, the Sonthal Parganas, Hazaribagh and Palamau and has fallen in Hooghly, Jessore, Puri and Ranchi. Cattle disease is reported from Birbhum, Patna, Muzaffarpur, the Sonthal Parganas and from all the districts of the Orissa and Chota Nagpur divisions except Balasore and Singhbhum. Fodder is reported to be getting scarce in parts of the Sonthal Parganas. The supply of water is ample throughout the Province.

United Provinces.—No rain fell during the week. Slight damage to crops from frost or hail is reported from seven districts but the general condition of standing crops is excellent. Irrigation of spring crops and pressing of sugarcane continue. Cattle disease is prevalent in parts of eighteen districts but the condition of agricultural stock is generally good. Fodder and supplies are abundant. Prices have fallen in twelve districts. Elsewhere they are practically unaltered.

Punjab.—Rainfall *nil*. Pressing of sugarcane is in progress in certain districts. Harvesting of *toru* continues in Lyallpur. Ploughings for and sowings of extra spring crops are in progress in several districts. The condition and prospects of standing crops are good to average. Prices are easy. Cattle are in good condition. Fodder is generally sufficient.

North-West Frontier Province.—No rain fell during the week. It is badly wanted in Dera Ismail Khan. The condition of standing crops generally is from average to good, but unirrigated crops in Dera Ismail Khan are reported below the average. Sugarcane is still being pressed in the Pe-hawar and Bannu districts. The water supply is sufficient throughout the Province, but is somewhat scanty in the Shigga and Pakha circles of the Marwat tahsil in the Bannu district. There is no irrigation from the Paharpur canal in the Dera Ismail Khan district. Fodder is generally procurable, but its price is rising in Dera Ismail Khan. The condition of cattle is generally good throughout the province but disease is reported from 2 villages of the Swabi tahsil in the Peshawar district. The public health is generally good. Prices of food grains are nearly stationary. Prices:—wheat $13\frac{1}{2}$ to $18\frac{3}{4}$; gram $19\frac{3}{8}$ to 30; maize $16\frac{1}{2}$ to $29\frac{1}{4}$; and *bajra* $23\frac{1}{8}$ seers per rupee.

Jammu.—A little rain fell during the week. Prices are stationary. Wheat sells from 13 to 22 and maize from 18 to 29 seers per rupee. The condition of standing crops is good. Cattle disease of ordinary type prevails in parts of Rajouri. Fodder is sufficient.

Kashmir.—It snowed and rained on one occasion during the week. The weather is mild. Fodder is sufficient. There is no disease among cattle. Prices are unchanged.

Rajputana.—Spring crops are being irrigated and are in good condition. Slight damage by cold and frost is reported in Mewar, Dungarpur, Kotah and Ajmer, a six anna damage to gram by blight in Partabgarh and a four anna damage to cotton from insects in Jaipur. Cattle disease prevails in Dungarpur and Banswara. Fodder is sufficient. Prices have risen by 15 chataks in Mewar and by 8 chataks in Dungarpur and Merwara. They have fallen by 2 seers 6 chataks in Karauli and by 1 seer in Shahpura, Kotah and Jhalawar. They are steady or fluctuate slightly elsewhere.

Central India.—Light showers are reported from Dhar. The severe cold and frost have caused slight damage to opium, *arhar* and spring crops. Standing crops are in good condition so far and prospects are generally favourable. Fodder is plentiful. Cattle disease is prevalent in all the Agencies except Bhopal and Malwa. Prices continue high in Baghelkhand, are falling in Bhopal and Bundelkhand and are steady elsewhere. Poppy is fair to good. Irrigation continues in Gwalior and Indore.

Central Provinces.—The weather has been clear and cool. Threshing and winnowing of autumn crops and picking of cotton have been completed. Some injury was caused by frost to spring crops, especially pulses in 3 districts each of the Jubbulpore and Nerbudda divisions and from blight in Akola. The damage sustained was considerable in Saugor, Betul and Chhindwara. Harvesting of spring crops continued in 12 districts. Prospects are excellent in Damoh and Seoni and generally good elsewhere. Preparation of land for sowing of the ensuing season's crop has started in Nimar, Wardha and Buldana. Fodder and water are sufficient. Agricultural stock is in good condition. Prices:—the price of gram and *juar* in Chhindwara rose by 4 and 3 seers per rupee respectively. The prices of staple food grains elsewhere remained steady or fluctuated slightly.

Fendatory States.—Cutting of spring crops is in progress. Cold winds did much damage to pulses and wheat in Kawardha and Nandgaon. Otherwise, the condition of spring crops is generally good. The supply of fodder and water is adequate everywhere. Prices—rice and *kodon* rose in Khairagarh by $4\frac{1}{2}$ and $2\frac{1}{2}$ seers per rupee respectively. Rice sells dearer by 2 seers in Raigarh.

Bombay.—Standing spring crops have suffered slightly from frost in parts of Sukkur, the Upper Sind Frontier, the Panch Mahals, Broach, the Deccan, Palanpur and Rewa Kantha, from unfavourable wind in the Upper Sind Frontier and are good elsewhere. Threshing of autumn crops continues in parts of Broach, the Konkan and the Deccan. Estimates of outturn are generally fair to good. Harvesting of spring crops is progressing in parts of Kaira, the Deccan, the Karnatak and Kolhapur. Cotton has been damaged by frost in parts of Ahmedabad, Broach, Kathiawar and Cutch. Picking continues in parts of Ahmedabad, Broach, Surat, Baroda, Cutch and Rewa Kantha. The fodder supply is adequate. Agricultural stock is deficient in parts of the Deccan but is generally in good condition. The supply of water for drinking and irrigation is generally adequate. Grain stocks are sufficient. Prices have risen in Kanara, Khandesh, Ahmednagar, Sholapur, Bijapur and Dharwar, have fallen in the Upper Sind Frontier and are generally stationary elsewhere. The quantity purchasable per rupee is in Sind 8 to 30 per cent., in the Konkan 13 to 28 per cent., in the Deccan 8 to 32 per cent. and in the Karnatak 23 to 28 per cent. less than the normal. In Gujarat prices ranged from normal to 29 per cent. less than normal.

Hyderabad.—No rain fell during the week. Spring crops are fair to good and are being harvested in places. The crop has generally suffered owing to severe cold in parts of Mahratwara and the *juar* crop has almost withered. Late rice is being weeded and sowings are proceeding in places. Cattle disease prevails in thirteen talukas. Prices:—wheat $7\frac{1}{2}$, coarse rice $7\frac{1}{2}$ and *juar* 15 seers per rupee, showing a further rise of $\frac{1}{2}$ seer in the price of *juar*. White *juar* is selling in Hyderabad City at 12 and yellow *juar* at 13 seers, showing a rise of 1 seer each in both white and yellow *juar*. The highest price in districts is 9 seers in Warangal and Adilabad and the lowest 24 seers in Nander and Mahbubnagar.

Mysore.—Prices of food grains are generally steady. Markets are well supplied. Standing crops are in good condition. Harvesting operations are in progress. Prospects of the season are good. Cattle are healthy. Water and fodder are available.

Coorg.—Picking of coffee and harvesting of rice continue. Prices of food grains are normal. Water and fodder are ample.

Madras.—No rain fell during the week. The rainfall in fourteen districts is above the average of the last thirty-five years. Irrigation supplies are sufficient except in parts of Chingleput, South Arcot, Coimbatore and Trichinopoly. Ploughing, sowing, weeding and transplanting are in progress in parts. Standing crops are fair to good but some in parts of Guntur, Salem and Madura require rain and some in parts of Chingleput, Tanjore

and Tinnevely are withering. Coffee in parts of the Nilgiris has been affected by bug. Harvests continue with outturn fair to normal. Pasture is sufficient except in parts of Ganjam, Guntur, Bellary, Nellore, North Arcot, Coimbatore, Trichinopoly and Tinnevely. Fodder is scanty in parts of Nellore. The condition of cattle is generally good. The price of rice is stationary in twelve districts, has fallen in five and has risen in seven. The prices of millets have fluctuated as follows:—*Ragi* is stationary in eight districts, has fallen in six and has risen in eight. *Cholam* is stationary in four districts, has fallen in five and has risen in six. *Cumbu* is stationary in five districts, has fallen in five and has risen in six. The public health is generally good. Prospects are generally fair. The condition of the labouring classes is everywhere satisfactory and employment is readily available. Grain stocks are sufficient.

E. D. MACLAGAN,
Secretary to the Government of India.

CIRCULAR No. 3-F-325-2.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

(FORESTS.)

Simla, the 8th February 1911.

INDIAN FOREST SERVICE.

Regulations as to the Appointment of Probationers, 1911.

1. *Appointments.*—The Secretary of State for India in Council will, in the summer of 1911, make not less than five appointments of Probationers for the Indian Forest Service, provided that so many candidates are considered to be in all respects qualified.

In making these appointments, he will act with the advice of a Selection Committee.

2. *Applications for Appointment.*—Applications for appointment must be made on a printed form to be obtained from the Secretary, Judicial and Public Department, India Office, Whitehall, London, S.W., and to be returned to him not later than Saturday, the 1st July 1911. Candidates must be prepared, if called upon, to attend at the India Office, at their own expense, for a personal interview with the Selection Committee within three weeks from that date.

3. *Age Limit.*—Candidates must be under the age of 23 years on the 1st July 1911.

4. *Nationality, etc.*—Every candidate must be a natural-born British subject. He must be unmarried, and if he marries before he reaches India he will forfeit his appointment. He must be of good physique, and must produce evidence of character to satisfy the Secretary of State for India in Council that he is suited for the Indian Forest Service.

5. *Qualifications.*—Preference will be given to candidates who can show that in addition to a good general education as described in the next paragraph they have passed with honours in a public examination for a degree in some branch of Natural Science held by a University in Great Britain or Ireland.

6. In case the number of duly qualified candidates, who have taken such a degree, is not sufficient to fill the number of appointments, the Secretary of State for India in Council will nominate candidates who bring evidence to show that they have received a good general education, and that they have a good knowledge of Chemistry and Mechanics and Physics as indicated in the appended Syllabus (Appendix I). A good general education should be understood to include, at the least, a fair knowledge of English Composition, Mathematics up to and including Plane Trigonometry, and either German or French. The production of school certificates granted by the examining authorities of Universities, or of certificates that a candidate has passed the Matriculation Examination of a University, in the subjects named, or of other certificates held by the Secretary of State in Council to be equivalent, will be taken to show that a candidate satisfies the requirements of this clause. Candidates of this class must not be less than 19 years of age on the 1st of July 1911.

Should there be more candidates considered by the Selection Committee to be qualified in every respect than vacancies to be filled, the Secretary of State reserves the right to require them to pass a competitive examination

conducted by the Civil Service Commissioners, on the results of which their final selection would depend.

7. *Medical Examination.*—Those candidates who are selected as Probationers will be required to undergo a strict examination by a Medical Board at the India Office, at which particular stress will be laid on good vision and hearing (*see Appendix V*).

On passing this medical examination candidates will be deemed to be Probationers for the Indian Forest Service.

8. *Period of Probation.*—In the case of Probationers who have passed with Honours in Natural Science, as indicated in paragraph 5, the period of probation will extend over two years. In the case of students who have obtained a Diploma in Forestry the period may be two years or less, as may be specially arranged. The Probationers will be required to undergo a special course of study at Oxford, and to become members of the University, if not so already. During the vacations they will receive, under suitable supervision, practical instruction in such British and Continental forests as may be selected for the purpose. Excursions are also made for purposes of study in term-time.

In the case of Probationers who have not passed with Honours in Natural Science, the period of probation will extend over about three years.

Probationers must obtain the Diploma of Forestry of the University of Oxford; those who have passed with Honours in Natural Science within two years, and the others within three years. The case of students who have already obtained at another University such a Diploma will be specially considered.

9. *Charges.*—The Probationers will be required to defray all expenses of lodging, board, tuition, and excursions, while at Oxford, and on practical instruction in Britain and on the Continent, with the exception of fees payable to local forest officers in Britain and on the Continent.

10. *Allowances.*—The Secretary of State for India in Council will pay to each Probationer possessing a degree in Natural Science, or a Diploma in Forestry, the sum of 120*l.* annually, or a total of 240*l.* (besides the fees to local officers mentioned above). These payments will be made on the following dates in each year :—

	£
On the 1st December	30
On the 1st March	30
On the 1st June	60

In the case of Probationers who have not passed with Honours in Natural Science or obtained a Diploma in Forestry before being appointed Probationers, the Secretary of State in Council will give the same total allowance of 240*l.* (in such instalments as may be required to meet the expenses of the practical work), and will defray (as above) the fees payable to local forest officers.

The grant of the allowances is subject to the following conditions :—

- (a) that the progress of the Probationer in his studies is satisfactory;
- (b) that the Probationer gives security to refund the payments in case he fails to join the Indian Forest Service at the end of the period of probation.

11. *Conduct.*—Every Probationer will be required to conduct himself during the period of probation in a manner satisfactory to the Secretary of State, and to give evidence of satisfactory progress in his studies in such a manner as may be required, failing which, or in the event of serious misconduct, he will be liable to have his name removed from the list of Probationers.

12. *Appointment and Seniority.*—Probationers who obtain the Diploma of Forestry, and are of sound constitution and free from physical defects which would render them unsuitable for employment in the Indian Forest Service, will be appointed Assistant Conservators in the Indian Forest Department. Their position in the provincial Forest List will be determined

by the results of the examinations held during their probation; but in making selections for the post of Conservator, officers of the same year are reckoned as equal in seniority.

They will be allowed at the end of the period of probation to state their preference in respect to the Provinces to which they desire to be allotted; but the distribution will be made to the several Provinces according to the needs of the public service, at the discretion of the Secretary of State for India. Officers are, however, at all times liable to be transferred from one Province to another at the pleasure of the Government of India.

13. *Riding*.—Every Probationer, before proceeding to India, will be required to satisfy the Secretary of State, in such manner as may be determined, of his ability to ride.

14. *Articles of Agreement*.—Within a month of his nomination as Assistant Conservator, each nominee must sign articles of agreement describing the terms and conditions of his appointment; he must embark for India when required to do so by the Secretary of State, and must engage his own passage. Failure to embark at the stated time will, in the absence of satisfactory explanation, lead to forfeiture of appointment.

15. *Salary*.—An Assistant Conservator of Forests will draw pay at the rate of Rs. 380 a month (equivalent to 304*l.* a year, when the rupee is at 1*s.* 4*d.*) from the date of his reporting his arrival in India.

16. *Promotion, Leave, Pension, and Provident Fund*.—Promotion, leave, and pension will be governed by the Regulations laid down by the Government of India, and applicable to Forest officers, such regulations being subject to any modifications or alterations which may be made in them from time to time by the Government of India, and their interpretation in case of any doubt arising being left to that Government. A copy of the existing regulation can be seen on application at the India Office.

Certain information regarding appointments in the upper controlling staff of the Indian Forest Service, the pay of which has been recently improved, will be found in Appendix II; a summary of information regarding Leave is contained in Appendix III; and regarding Pensions and the Provident Fund in Appendix IV.

INDIA OFFICE,
November 1910.

APPENDIX I (*referred to in paragraph 6*).

SYLLABUS OF SPECIAL SUBJECTS FOR CANDIDATES WHO HAVE NOT PASSED WITH HONOURS IN A PUBLIC EXAMINATION IN NATURAL SCIENCE.

I.—CHEMISTRY.

The simpler chemical and physical properties of common substances, such as lime, salt, sugar, water, air.

The preparation (excluding details of technical processes) and properties of the following substances :—

The metals, tin, lead, iron, copper, zinc, magnesium, calcium, potassium, sodium; their simpler and more important compounds, especially such as occur naturally, and such compounds and alloys as are used in the Arts.

Hydrogen, oxygen, water, ozone, hydrogen-peroxide.

Nitrogen, ammonia, ammonium salts, nitrous oxide, nitric oxide, nitrogen peroxide, nitrates.

Carbon, carbon dioxide, carbonates, carbon monoxide.

Chlorine, bromine, iodine, chlorides, bromides, iodides, chlorates, hypochlorites.

Sulphur, sulphuretted hydrogen, sulphides, sulphur dioxide, sulphur trioxide, sulphites, sulphates.

Phosphorus, phosphoretted hydrogen, phosphorus trioxide, phosphorus pentoxide, orthophosphates, phosphorus trichloride, phosphorous pentachloride.

Silica.

The principles of chemical change; oxidation and reduction; combustion; flame. Allotropy. Methods of purifying bodies. Methods of determining the composition of air and of water. Laws of chemical combination. Diffusion of gases. The atomic and molecular hypotheses. The simpler methods of determining equivalents. General considerations used in determining molecular weights and atomic weights. Chemical notation.

Alcohol, ethane, and the simpler ethylic compounds, considered in detail as typical bodies. Methylic alcohol and methane, and benzylic alcohol and toluene, considered briefly as analogues of alcohol and ethane. Characters of primary normal alcohols in general, and of their corresponding hydrocarbons.

Acetic acid, aldehyd and the simpler acetic compounds, considered in detail as typical bodies. Benzoic acid and benz-aldehyd, and formic acid and form-aldehyd, considered briefly as analogues of acetic acid and aldehyd. Characters of normal mon-acids in general and of their corresponding aldehyds.

Oxalic acid and the simpler oxalic compounds. Characters of normal di-acids in general.

Processes (i) for the detection of carbon, hydrogen, nitrogen, sulphur in organic compounds; (ii) for the estimation of carbon, hydrogen, nitrogen in organic compounds; (iii) for the production and analysis of the silver-salts of organic acids and the platinum-salts of organic bases; (iv) for the determination of vapour densities by the V. Meyer method.

The determination of the formula of an organic compound.

PRACTICAL WORK.

The Practical Work should include :—

Simple experiments and preparations illustrating the properties of the inorganic substances named above.

Simple quantitative experiments, such as, the determination of the loss of weight on heating a body, the determination of the volume of gas evolved

on the solution of zinc in acid. The volumetric estimation of acids and alkalies.

The qualitative analysis of simple salts containing not more than one of the following metals, and one of the following acid radicals:—Sodium, potassium, ammonium, calcium, magnesium, zinc, copper, iron, lead, tin, oxide, carbonate, chloride, sulphate, nitrate, sulphide.

II.—MECHANICS AND PHYSICS.

Mechanics.

The principles of the lever, the inclined plane, the composition of forces, and virtual work, their experimental investigation and application to machines and other simple cases of equilibrium. Centre of gravity, couple, torque, velocity ratio, mechanical advantage, efficiency. Application to liquids and gases. Density. Boyle's law. Pump, siphon, barometer, manometer. Body moving in a straight line so that its velocity changes proportionally with the time. Body moving uniformly in a circle. Motion of pendulum-bob. Momentum, force, impulse of a force, energy, conservation of energy.

Heat.

Simple thermometry. Simple methods of determining latent heats; specific heats; expansion of gases, liquids and solids; vapour pressures. Change of state. Simple experiments on conduction, convection and radiation. Mechanical equivalent of heat.

Sound.

Direct determination of the velocity of sound in air and in water; the effect of change of temperature on the velocity of sound in air; mode of propagation of sound in air. Simple methods of determining the pitch of a note. Characteristics of musical sounds.

Light.

Laws of reflection and refraction. Simple methods of determining refractive indices, and the focal lengths of mirrors and lenses. The simplest form of the compound microscope and of the astronomical telescope. Dispersion, the spectroscope, spectra of different kinds. Simple photometry. Elementary notions of the determination of the velocity of light.

Electricity and Magnetism.

Properties of electrified bodies. Methods of electrification. Electric induction. The gold leaf electroscope. Elementary quantitative notions of electrical quantity, capacity, potential, and specific inductive capacity. Condensers. Properties of magnets. Methods of magnetization. Magnetic induction. Simple methods of determining the declination and dip at a place and of comparing magnetic fields and moments. The construction of the batteries of Volta, Daniell, and Leclanché, and their theory. The secondary battery. The physical and chemical action due to a current. Simple galvanometers, ammeters, and voltmeters. Measurement of current-strength, electromotive force and resistance. The production of currents by electro-magnetic induction. The broad principles of the induction-coil and dynamo.

PRACTICAL WORK.

Simple experiments illustrating the principles stated above.

APPENDIX II.

LIST OF APPOINTMENTS OPEN TO MEMBERS OF THE IMPERIAL BRANCH OF THE INDIAN FOREST SERVICE.

NOTE.—*This list is liable to alteration at any time.*

Appointment.	Salary.
1 Inspector-General of Forests	Rs. 2,650 a month.
*1 Assistant Inspector-General of Forests	—
2 Chief Conservators (Burma and Central Provinces)	2,150 "
20 Conservators, in three grades	{ 1,900 " 1,700 " 1,500 " } respectively.
183 Deputy and Assistant Conservators	† Rs. 380 a month, rising by annual increments of Rs. 40 a month to Rs. 700 a month; thereafter, by annual increments of Rs. 50 a month, to Rs. 1,250 a month, in the twentieth year of service.
5 Foreign Service appointments	
†6 Officers employed at the Forest Research Institute and College, Dehra Dun.	

The sanctioned appointments in the Imperial Forest Service are allotted to the various provinces as follows:—Burma, 66; Madras, 34; Bombay, 27; Central Provinces, 24; Bengal, 11; United Provinces, 19; Punjab 12 and Eastern Bengal and Assam, 18.

* The officer holding this appointment draws in addition to the pay of his grade a minimum local allowance of Rs. 200 a month.

† Until he has passed the prescribed Departmental examinations, an Assistant Conservator may not draw pay at a higher rate than Rs. 460 a month. On passing the examinations, he will resume drawing pay under the time scale at the rate to which his length of service entitles him.

‡ These draw a local allowance of Rs. 150 a month in addition to their grade pay, with the exception of the Principal of the College, in whose case the allowance is at the rate of Rs. 200 a month.

NOTE.—Under the improved scale of salary shown above, no Exchange Compensation Allowance is granted.

APPENDIX III.

(See paragraph 16 of the Regulations.)

LEAVE.

1. The following is a summary of the principal regulations relating to the leave admissible to officers appointed to the Indian Forest Service by the Secretary of State from the United Kingdom.

Long Leave.

2. Furlough and special leave with allowances (see paragraph 6) are admissible to an aggregate maximum amount of six years during an officer's service. The amount of furlough "earned" is one-fourth of an officer's active service, and the amount "due" is that amount less any enjoyed.

3. Furlough without medical certificate can, if due, be generally taken after eight years' active service, and again after intervals of not less than three years' continuous service. It is limited to two years at a time.

4. Furlough on medical certificate may be granted (a) to an officer who has rendered three years' continuous service, for not more than two years, but capable of extension up to three years; and (b) to an officer who has not rendered three years' continuous service, up to one year in any case, and up to such longer period, if any (but not exceeding two years in all), as the officer may have furlough "due" to him.

5. The allowances admissible during furlough are:—

- (1) During the first two years of furlough without medical certificate and during so much of furlough with medical certificate as may be "due"—half average salary, subject to certain maximum and minimum limits.

- (2) After the expiration of the period for which the foregoing allowances are admissible—one quarter of average salary, subject to certain maximum and minimum limits.

6. Special Leave may be granted at any time for not more than six months, with intervals of six years' service; allowances, calculated as during furlough, are given during the first six months only, whether taken in one or more instalments.

Short Leave.

7. Privilege Leave is a holiday which may be granted to the extent of one-eleventh part of the time that an officer has been on duty without interruption; and it may be accumulated up to three months, earned by 33 months' duty. During privilege leave, the officer retains a lien on his appointment, and receives the salary which he would have received if on duty. An interval of not less than six months must elapse between two periods of absence on privilege leave.

Privilege leave may be prefixed to furlough, special leave, or extraordinary leave without allowances. The whole period of leave thus taken in combination is known as combined leave. Combined leave may not be granted for a period of less duration than six months, nor, except on medical certificate, may it be extended beyond two years.

8. Subsidiary Leave in India for a minimum of 10 days, usually with half average salary, is granted to an officer proceeding on or returning from leave out of India, or on retirement, to enable him to reach the port of embarkation or to rejoin his appointment. It is admissible only at the end and not at the beginning of combined leave.

9. Short Leave is also granted to enable officers to appear at examinations, etc.

10. Extraordinary Leave without allowances may be granted in case of necessity, and, except in certain specified cases, only when no other kind of leave is by rule admissible. It may be granted in continuation of other leave.

General Rules.

11. Leave of absence, whether on furlough or on privilege leave, can never be claimed as of right, and is given or refused at the discretion of Government.

12. After five years' continuous absence from duty, an officer is considered to be out of the employment of Government.

13. When leave allowances other than privilege leave pay are paid at the Home Treasury, or in a Colony where the standard of currency is gold, rupees are converted into sterling at the rate of exchange fixed for the time being for the adjustment of financial transactions between the Imperial and Indian Treasuries, unless any other rate has been exceptionally authorised. But for the present the rate of conversion is subject to a minimum of 1s. 6d. to the rupee. Privilege Leave pay when issued from the Home Treasury (this is only admissible when privilege leave is combined with other leave) is converted at 1s. 4d. to the rupee.

APPENDIX IV.

(See paragraph 16 of the Regulations.)

PENSIONS AND PROVIDENT FUND.

1. The following is a summary of the principal pension rules applicable to officers of the Indian Forest Service appointed by the Secretary of State from the United Kingdom.

An officer of the Indian Forest Service is eligible for a pension on voluntary retirement after completing 20 years' qualifying service or attaining the age of 55 years. If at an earlier date he is compelled to retire from the service through ill-health, not occasioned by irregular or intemperate habits, he becomes eligible for an invalid pension or a gratuity according to the length of his service.

The amount of pension or gratuity is regulated as follows :—

After a service of less than 10 years, an invalid gratuity not exceeding one month's emoluments for each completed year of service.

After a service of not less than 10 years an invalid pension not exceeding the following amounts :—

Years of completed service.	Maximum limit of pension.	
	Rs.	Rs.
10	1,000 a year or 83½ a month.	
11	1,400	116½
12	1,800	150
13	2,200	183½
14	2,600	216½
15	3,000	250
16		
17		
18		
19		

After a service of not less than 20 years, a retiring pension not exceeding the following amounts :—

Scale of pension.

Years of completed service.	Sixtieths of average emoluments.	Maximum limit of pension.	
		Rs.	Rs.
20 to 24	30	4,000 a year or 333½ a month.	
25 and above		5,000	416½

Officers who have shown special energy and efficiency during an effective service of three years as Inspector-General of Forests or Conservator may, at the discretion of the Government of India, be allowed an additional pension of Rs. 1,000 a year, subject to the condition that the officer must not retire voluntarily before the completion of a total qualifying service of 28 years.

Subject to certain prescribed conditions, rupee pensions are now issued to pensioners residing in countries where the Indian rupee is not legal tender at the rate of exchange of 1s. 9d. the rupee.

2. A General Provident Fund has also been established on the following basis :—

- The contribution is compulsory up to 6¼ per cent. on salaries, with voluntary contributions of not more than a further 6¼ per cent. Subscriptions on leave of any kind are optional.
- Compound interest on such payments is annually credited by Government to each officer subscribing, the rate being at present 4 per cent. per annum.
- The sum which will thus accumulate to the credit of an officer to be his absolute property, to be handed over to him unconditionally on quitting the service; or, in the event of his death before retirement, to his legal representatives.

APPENDIX V.

GENERAL PHYSICAL REQUIREMENTS.

Note.—These Regulations are published for the convenience of candidates and in order to enable them to ascertain the probability of their coming up to the required physical standard. But it must be clearly understood that the Secretary of State reserves to himself an absolute discretion to reject as unfit any candidate whom he may consider, after hearing the opinion of his medical advisers, to be physically disqualified for the public service; and that his discretion is in no respect limited by these Regulations.

1. A candidate must be in good mental and bodily health, and free from any physical defect likely to interfere with efficient performance of duty.

2. In the examination of candidates the Medical Board will apply the following table of correlation of age, height, and chest girth:—

Age.	Height without shoes.	CHEST.	
		Girth when expanded.	Range of expansion.
19 to 20	Inches. 62½ and under 65	Inches. 35	Inches. 2
	65 „ 68	35	2
	68 „ 70	35½	
	70 „ 72	36	2
	72 and upwards	36½	2½
21 and upwards	62½ and under 65	35	2
	65 „ 68	35½	2
	68 „ 70	36	2
	70 „ 72	36½	2½
	72 and upwards	37	2½

3. *Measurement of Height.*—The candidate will be placed against the standard with his feet together, and the weight thrown on the heels, and not on the toes or outside of the feet. He will stand erect without rigidity, and with the heels, calves, buttocks, and shoulders touching the standard; the chin will be depressed to bring the vertex of the head level under the horizontal bar, and the height will be noted in parts of an inch to eighths. No fixed limit of height is imposed.

4. *Measurement of Chest.*—The candidate will be made to stand erect with his feet together, and to raise his hands above his head. The tape will be carefully adjusted round the chest, the posterior upper edge touching the inferior angles of the shoulder blades, and its anterior lower edge the upper part of the nipples. The arms will then be lowered to hang loosely by the side, and care will be taken that the shoulders are not thrown upwards or backwards so as to displace the tape. The candidate will then be directed to empty his chest of air as much as possible. This is best done by continuous whistling with the lips as long as sound can be produced. The tape is carefully gathered in during the process, and when the minimum measurement is reached it is recorded. The candidate will then be directed to inflate his chest to its utmost capacity. This maximum measurement will likewise be noted. The girth with the chest fully expanded and the range of expansion between the minimum and the maximum will then be recorded.

5. The hearing must be good.

6. The speech without impediment.

7. The teeth in good order, *i.e.*, decayed or broken teeth must be properly stopped or crowned, and deficient teeth replaced by artificial teeth where necessary for effective mastication.

8. The chest must be well formed, the lungs and heart sound.

9. Rupture, hydrocele, varicocele, varicose veins in a severe degree, or other condition likely to cause inefficiency will disqualify a candidate, unless such condition is cured by operation.

10. The limbs, feet, and toes must be well formed and developed, with free and perfect motion of all the joints.

11. A candidate must have no congenital malformation or defect likely to interfere with efficiency.

12. A candidate must not be the subject of chronic skin disease.

13. Evidence of previous acute or chronic disease pointing to an impaired constitution will disqualify.

14. Candidates may, not more than two years before they are qualified to compete for an appointment, undergo a preliminary examination by the Medical Board, which meets at the India Office every Tuesday, under the following conditions:—

(a) Applications must be addressed to the Under Secretary of State, India Office, Whitehall, London, accompanied by a fee of two guineas, and a statement of the candidate's age.

(b) Candidates must pay their travelling expenses.

(c) Candidates considered to be unfit by the Medical Board at this preliminary examination are not bound to accept its opinion, but may, *at their own risk*, continue their studies, with the knowledge that they will have to submit themselves for a final medical examination by the Medical Board, prior to their appointment.

(d) On the other hand, it must be distinctly understood that the preliminary examination by the Medical Board is held solely for the candidate's information, and that, if after that examination he is reported to be apparently fit, he has not on that account any claim to be accepted as physically fit when he presents himself for the final Medical Examination, upon which alone his acceptance or rejection will depend. Candidates may be considered fit for the Service at the preliminary examination, but may be found at the final examination to be unfit, either on account of some physical defect which did not exist or passed undetected at the preliminary examination, or for other reasons.

REGULATIONS AS TO THE STANDARD OF VISION FOR THE INDIAN FOREST SERVICE.

1. If myopia in one or both eyes exists, a candidate may be passed, provided the ametropia does not exceed 2.5 D, and if with correcting glasses, not exceeding 2.5 D, the acuteness of vision in one eye equals $\frac{6}{8}$ and in the other $\frac{6}{8}$, there being normal range of accommodation with the glasses.

2. Myopic astigmatism does not disqualify a candidate for service, provided the lens or the combined spherical and cylindrical lenses required to correct the error of refraction do not exceed—2.5 D; the acuteness of vision in one eye, when corrected, being equal to $\frac{6}{8}$, and in the other eye $\frac{6}{8}$, together with normal range of accommodation with the correcting glasses, there being no evidence of progressive disease in the choroid or retina.

3. A candidate having total hypermetropia not exceeding 4 D is not disqualified, provided the sight in one eye (when under the influence of atropine) equals $\frac{6}{8}$ and in the other eye equals $\frac{6}{8}$ with + 4 D or any lower power.

4. Hypermetropic astigmatism does not disqualify a candidate for the service, provided the lens or combined lenses required to cover the error of refraction do not exceed 4 D, and that the sight of one eye equals $\frac{6}{8}$ and of the other $\frac{6}{8}$ with or without such lens or lenses.

5. A candidate having a defect of vision arising from nebula of the cornea is disqualified if the sight of one eye be less than $\frac{6}{12}$. In such a case the better eye must be emmetropic. Defects of vision arising from pathological or other changes in the deeper structures of either eye, which are not referred to in the above rules, may exclude a candidate for admission into the service.

6. Squint, or any morbid condition, subject to the risk of aggravation or recurrence, in either eye, may cause the rejection of a candidate. The existence of imperfection of colour sense will be noted on the candidate's papers.
